Cookies: HTTP State Management Mechanism draft-ietf-httpbis-rfc6265bis-10 Nov 7, 2022

Changes: -10 draft

- Standardize Max-Age/Expires upper bound: <u>#1732</u>, <u>#1980</u>
 - Expiry date now SHOULD be capped at 400 days in the future
- Expand on privacy considerations and third-party cookies: <u>#1878</u>
 - Expands spec's opinion on the privacy concerns of cookies
- Specify that no decoding of Set-Cookie line should occur: <u>#1902</u>
 - UA should not attempt to decode percent encoded character
- Require ASCII for domain attributes: <u>#1969</u>
 - The value of the Domain attribute must be a string of ASCII characters
- Editorial Changes:
 - <u>#1789, </u>#1858, <u>#2069</u>

Recent changes since -10

- Remove note to ignore Domain attribute with trailing dot: <u>#2087</u>, <u>#2092</u>
 - Correction that trailing '.'s should be ignored
- Remove an inadvertent change to cookie-octet: <u>#2090</u>
 - For 2 years servers were incorrectly advised to include %x80-FF
- Remove note regarding cookie serialization: <u>#2165</u>
 - The note wasn't quite correct and could be better handled by the HTML spec
- Add case insensitivity note to Set-Cookie Syntax: <u>#2167</u>
 - Clarify that attribute names are case insensitive
- Add note not to send invalid cookies due to public suffix list changes: <u>#2215</u>
 - Discourage sending cookies that are part of a public suffix
- Add warning to not send nameless cookies: <u>#2220</u>
 - Discourage nameless cookies of any sort
- Improved max-age attribute parsing: <u>#2214</u>
 - Notes that values are base 10. Handle missing and invalid values.

Recent changes since -10 Continued

- Offload Service Worker SFC computation to spec: <u>#2217</u>
- Compare cookie name prefixes case-insensitively: <u>#2236</u>
- Prevent nameless cookies with prefixed value: <u>#2251</u>
- Editorial Change: <u>#2244</u>

Current Issue Status

3 open issues

- Currently in Scope
 - Same-Site cookies and redirects: <u>#2104</u>
 - Enforcement of same-site redirect chains results in copious site breakage
 - internal whitespace in cookie names and values: <u>#2262</u>
 - The spec should more clearly advise which parts a reader should implement: <u>#2229</u>
- An additional 18 deferred issues
